RESUME OBJECTIVE

I am a software engineering master's degree student and a backend developer. I'm currently looking for a junior backend developer job or internship in order to use and improve my skills.

SUMMARY

- Worked on various projects in Node.js and React as part of self-learning.
- Took the 'Web Scraping and API Fundamentals in Python' course from 365 data science.
- Took the 'JavaScript Algorithms and Data Structures' course from freecodecamp.
- Eager to learn new skills and technologies.

TECHNOLOGIES

Javascript, Python, Node.js, MongoDB, MySQL, Sequelize ORM, Html5, Css3, Bootstrap, React.js, Git and Postman.

PROJECTS

DevConnector:

- A social network web application for developers.
- Technologies I used: Express.js, MongoDB and React. I used Postman to test the API and git for source code management and I also used the github API.

Postingg:

- It's a blog or a platform that allows people to share or explore articles with many other features. I'm done with the backend and I'm still working on its frontend.
- Technologies I used: Express.js, MongoDB, React.js, I used Postman to test the API and git for source code management and I manipulated all the CRUD operations.

EDUCATION

Master's degree in Software Engineering

University of Science and Technology Houari Boumediene, Algiers, Algeria

2021- ongoing

Bachelor's degree in Computer Science

University of Science and Technology Houari Boumediene, Algiers, Algeria

2017 - 2021

Final year project: TEAMAB, a platform that connects teams through instant messaging, audio and video calls. I collaborated with a friend through github and I helped in the backend side of the app where I used Node.js with Express.js framework to create the REST API and SQLite with Sequelize ORM.

LANGUAGES

Arabic: native language, advanced proficiency in English, intermediate in French.
