# RAMZI MAHNOUNE

## WEB DEVELOPER

### RESUME OBJECTIVE

I am an ambitious software engineering master's student and a web development enthusiast, I'm currently looking for a remote job or internship in order to use and improve my skills especially in the web development field.

### SUMMARY

- Worked on various solo projects in Node.js and React as part of self-learning .
- took 'Web Scraping and API Fundamentals in Python' course from 365 datascience.
- took 'JavaScript Algorithms and Data Structures' course from freecodecamp.
- Eager to learn new skills and technologies.

### PROJECTS

#### • DEV CONNECTOR:

A social network for developers created using the mern stack as part of a react course i took .

#### • POSTINGG:

It's a blog or a platform that allows people to create an account and share or explore articles with many other features. i'm done with the backend and i'm still working on it's frontend.
